Hi Bob,

I am thinking all that is done by ANR can be put into 2 boxes:

1. Protecting Guam's Agriculture and Natural Resources

- plant protection sciences and diagnostics
- invasive species prevention, detection and control
- etc.

2. Developing Guam's Agriculture and Natural Resources

- animal and plant industry
- agricultural economics
- new crops (variety trials)
- new farmer program
- back yard agriculture and aquaculture
- SARE projects
- etc.

All the Best,

- Aubrey
